v minec and custom surface support.
Just one step of gen is not enough.
Collided or not (Giant impact hypothesis, true - ign, false -).
World divided by tectonic plates, geting postf in v.
Divided by areas of rocks (orogen, shield, yield etc)
World layers
1. Regolith (soil)
2-∞. Bedrock layers
Bedrock parts

1. Country rock - silicates, carbonates, aluminates (?) etc - compounds of most abundant elements.

2. Igneous intrusives, valuable rocks on country rocks.

---

3. Void (instead mantle - too small height)
